MAIN PRESENTATIONS (1 to 8 hours):

Functional Jaw Orthopedics (FJO): Reviews FJO treatment, clinical dental & medical results, normal/abnormal jaw/airway formation, effects of bottle & breast feeding, habits, tonsils, general dentistry, braces-without-braces, and nutrition.

Controversies in Dentistry: Reviews dentistry's new future, amalgams/composites, antibiotic pre-medication, dental benefits, orthodontics even at age 3, orthodontic extractions (serial, bi-cuspid, 2nd & 3rd molars), expanded functions, indirect supervision, waterlines, & perio/apnea/heart disease.

Medical Dentistry: Medical effects of dental treatment, research & clinical examples will be presented on ear disease, bed wetting, airway, hypoxia, sleep apnea, longevity, etc.

Your Jaws~Your Life: Reviews the topics in his new (January 2003) groundbreaking alternative medicine book.

Why NOT to Hire an Associate!: Learn the top10 reasons NOT to risk hiring another dentist for your office.

"Real" Early Orthodontics: Birth to Age 8: Learn how and why braces at age 8 can be too late and how and why "real" early treatment is very effective and efficient.

Other Power Point Presentations, Interviews and Limited Phone Consultations are also available.
